

 360° AGENCY

The full project brief for Evae.

A 360° personal-branding and digital agency for physicians. This document collects every decision made so far — positioning, palette, motion, structure, copy and open items — as a single brief to build from.

A full-service digital agency, built for doctors.

A personal-branding and digital agency for physicians and medical professionals. One team, one point of contact: positioning, brand identity, content and social, and a custom website. The name comes from *elevate*.

Faith is building the website and brand; Sean owns creative direction. Meta ads are deliberately excluded from the public offering for now, per the 16 September alignment.

Positioning line — to confirm

"Personal branding, for the modern physician." Alternatives on the table: "Where physicians become known." / "The digital agency for doctors."

The case study / proof of method

Doctor Hasia's own four-brand ecosystem is the primary case study — the same operator, the same playbook, across four niches. One case study speaks to every specialty Evae wants to serve, without an external client to launch.

BRAND	ROLE
Doctor Hasia — @doctorshasia	The anchor personal brand
Doctors Dose — @doctorsdose	Medical education & content
Doctor Hasia Bespoke — @doctorhasiabespoke	Premium private-client tier
The Collagen Doctor — @thecollagendoctor	Aesthetics & skincare niche

Cool to warm, glass-led, quietly futuristic.

Principles

- **Wordmark:** EVAE, all caps, Geist Light, wide tracking (~+0.22em). Custom joined-letterform version can follow later.
- **Type:** Geist throughout — no serif, no italic. Headlines fade white → warm mist.
- **Surfaces:** glass-morphism — frosted pills and cards, 1px light borders, soft blur, 1px inner top highlight.
- **Anchor:** the WHOOP "Daily insights, long-term impact" ad — product floating over a cool-to-warm gradient with three glass metric pills.
- **Guardrails:** desaturated cool-to-warm only. No neon, no purple/teal, no grids, no glow.

Glass tokens

Fill (gradient)	white 12–18%, top-to-bottom fade
Fill (light)	white 45–70% over Linen
Border	1px · white 25% / 90%
Blur	16–24px, one layer at a time
Highlight	1px inner top edge, white 30%
Radius	pills 999px · cards 16–20px · buttons 10–12px

Palette — sampled from page 1 of the proposal (no violet)

TOKEN	HEX	USE
 Graphite	#2A2C33	Footer · headlines on light · deepest tone
 Slate Blue	#5D5F6E	Top of hero gradient · body text on light
 Greige	#8C8A8B	Gradient mid-tone · secondary text · icons
 Warm Mist	#BAB8B9	Gradient tail · headline fade · hairlines
 Khaki	#B4B0A5	Warm accent · labels · dividers · pill icons
 Linen	#EDEAE4	Light section canvas (warm off-white)
 Signal Blue	#5A86A1	Primary buttons — one highlight per page only

Hero gradient: Slate Blue → Greige → Warm Mist (cool top/left, warming to bottom/right).

Quiet motion, glass surfaces, mobile-first.

Tier 1 — build this

Page-load reveals, scroll-triggered fades, sticky/pinned sections, gentle parallax (40–80px), animated counters, glass cards/pills, dark/light section rhythm, a slow service marquee. All native in Framer.

Tier 2 — optional, day-3 checkpoint

One scroll-scrubbed hero sequence, built as a canvas image sequence (90–120 WebP frames, ~2–4 MB total), always with a static fallback. Not a scrubbed `<video>` — that stutters on iOS Safari.

Tier 3 — not for launch

Multiple scrubbed sections or long pinned scroll-films. Defer to v2.

The category norm — WHOOP, Oura, Eight Sleep — is a looping autoplay background video plus fade reveals. That is the safe default and the path being taken. 80% of traffic is on phones; respect `prefers-reduced-motion` and cap blur at one to two layers per screen.

Build

- Tool: Framer (native backdrop blur, gradient text, scroll animation). Fallback: Webflow + GSAP ScrollTrigger.
- Timeline: two weeks — week one build, week two review / host / launch. The direction change added no days.
- In parallel: SEO audit of Doctors Dose, course curriculum outline, AI clip review, Monday newsletter to Krishna.

One landing page, ten sections.

Everything drives to one action: book a discovery call (Calendly + WhatsApp).

#	SECTION	MODE	HEADLINE
01	Hero	DARK	Personal branding, <i>for the modern physician.</i>
02	Belief	LIGHT	Being a great doctor <i>isn't enough anymore.</i>
03	Services	LIGHT	Everything a doctor needs <i>to be known online.</i>
04	Blueprint	DARK	Everything we do, <i>we've done for ourselves first.</i>
05	Process	LIGHT	Discovery → Strategy → Build → Grow.
06	Who it's for	LIGHT	Evae is for physicians <i>who are ready to be visible.</i>
07	Voice	LIGHT	One pull-quote (Doctor Hasia).
08	FAQ	LIGHT	Frequently asked questions.
09	Begin	DARK	Ready to be known <i>for more than your credentials?</i>
10	Footer	DARK	EVAE — Elevating the digital presence of medical professionals.

Secondary pages (phase two)

Case study (Doctor Hasia) · Approach · Course guide (client-only) · Journal (optional).

The wireframe canvas is live with all ten desktop artboards plus mobile hero and blueprint, copy drafted throughout.

Copy — bracketed items are placeholders.

01 · Hero. Pills: Followers [N] · Reach [N] · Growth [N]. Sub: One team, one point of contact — positioning, identity, content, social and a custom website for doctors who want to be known for more than their credentials. Buttons: Book a discovery call · Message on WhatsApp.

02 · Belief. Patients search before they book. Colleagues, hospitals and media look you up before they call. The physicians who are visible get the referrals, the panels and the private clients — the ones who aren't, don't. Evae builds the presence your expertise already deserves — without you learning to be a content creator.

03 · Services. Positioning & identity: find the niche you can own, then build the name, logo and visual system. Content & social: scripting, filming, editing and posting — reels, stills and AI-assisted production at scale — managed for you. Website & digital home: a custom site that carries your brand, your proof and one clear way to reach you.

04 · Blueprint. Four brands, one playbook — the same operator, the same process, across four niches. Each card carries Followers [N] · Reach [N]. Link: See the full case study.

05 · Process. Discovery call — a conversation with our operations lead. Strategy 1:1 — a session with Doctor Hasia to set niche, positioning and plan. Build — identity, website and first content cycle by a dedicated team. Grow — ongoing content and social, plus the full Evae playbook as a course.

06 · Who it's for. You're an established doctor with a specialty you want to be known for. You'd rather a team run your presence than learn to run it yourself. You want a brand that reads as credible to patients and peers, not as an influencer. You're ready to invest properly — pricing is discussed on the call, not on the page.

07 · Voice. "[Pull-quote from Doctor Hasia — one or two sentences, in her own words, about why presence changed her practice.]" — Doctor Hasia, Founder, Evae.

08 · FAQ. What exactly is included? [the 360° scope — positioning, identity, content, social and website, plus the course and the 1:1]. How long until I see results? Do I need to film myself or be on camera? Is this appropriate for a medical professional? How do we get started?

09 · Begin. Ready to be known for more than your credentials? Book a discovery call · Message on WhatsApp. Calendly · WhatsApp to [operations number].

10 · Footer. EVAE — Elevating the digital presence of medical professionals. Explore: Services · Blueprint · Process · FAQ. Social: Instagram · TikTok · LinkedIn. Contact: [hello@evae.co] · WhatsApp.

Assets produced.

- Backgrounds (Rescale "Background Fader" recolored): four stills (evae-bg-1...4, 2880×2200) and a looping video (evae-bg-loop.mp4 ~1.1 MB / .webm), all retinted from periwinkle to the cool→warm Evae palette so the fader stays consistent as it cross-fades. Two earlier variants exist (evae-bg-cool, evae-bg-cool-warm). In Framer: clear the template stills, upload these, set Hue/Saturation to 0; drop the mp4 in the Video Background slot (loop + muted + autoplay).
- Proposal: Evae_Website_Proposal_v2.pdf (Revision 2.1).
- Research: scroll-motion recommendation report.
- Wireframe: live canvas, 10 desktop + 2 mobile artboards.

Still outstanding — before launch.

- 1 Hero metric pill numbers [N]
- 2 Per-brand follower / reach figures on Blueprint
- 3 The four FAQ answers
- 4 Doctor Hasia's pull-quote (section 07)
- 5 Contact details — email + WhatsApp / operations number
- 6 Domain + trademark check (evae.com / .studio / .co)
- 7 Confirm: positioning line, Signal Blue, and the Tier-2 scroll-scrub go / no-go
